Arco is the UK’s leading supplier of personal protective equipment, workwear and workplace safety products offering a world-class range of over 170,000 products.

As Experts in Safety we are widely recognised as a provider of specialist advice through our sales office network and this is further supported by our training and consultancy division. We reach our customers through an extensive product catalogue, interactive website, local sales offices and over 47 retail stores. We pride ourselves on providing customers with great availability, performance and price.

Founded in 1884 Arco has a heritage spanning four generations. With traditional family values at the heart of the business we pride ourselves on our core values; respect, hard work, enterprise and excellence in reputation.

We fully subscribe to the ETI’s Nine Principles Base code and have fully incorporated the internationally recognised code of labour practice into our own ethical policy. In 2007 Arco was the first distributor in our industry to become a member of the Ethical Trading Initiative (ETI) and in 2010 we became a member of Sedex, the Supplier Ethical Data Exchange. We continually support local communities and charities donating in excess of 1% of pretax profits annually.

As we are members of the BSIF Registered Safety Suppliers Scheme you can be confident that we will supply safety equipment which is genuine and compliant with the relevant standards and regulations. The BSIF monitor and regulate members of the scheme by conducting regular audits.

Regulations and Standards

Employers have a legal duty to make arrangements to ensure their employees receive immediate attention if they are injured or taken ill at work. First aid can save lives and prevent minor injuries becoming major ones. The Health & Safety (First Aid) Regulations 1981 ACOP 3 (4) state that...

An employer shall provide, or ensure that there are provided, such equipment and facilities as are adequate and appropriate in the circumstances for enabling first-aid to be rendered to his employees if they are injured or become ill at work.

British Standard (BS) Compliant First Aid Kits

Complying with BS 8599-1, Workplace First Aid Kits:

In recognising the need to ensure that current workplace first aid provision is adequate and appropriate The British Healthcare Trade Association worked with the British Standards Institute (BSI), to create a new British Standard for first aid kits in the workplace.

These enhanced kits are based upon the minimum requirements set out by the Health & Safety Executive (HSE) in their latest First Aid at Work – Guidance on Regulations. The HSE states that ‘Employers may wish to refer to British Standard BS 8599 which provides further information on the contents of Workplace First Aid Kits.’ The contents of these kits takes into account more modern and functional products encompassing a wider range of common workplace risks and are therefore more comprehensive than the previous HSE compliant kits.

BS 8599-1 is the standard that sets the new minimum level that workplace first aid kits should conform to. The BS 8599-1 standard gives recommendations on the amount and size of the first aid kits necessary for different workplace environments based on the category of risk and number of employees in the workplace.

Should the risk or numbers of employees deem it necessary, the minimum contents as set out in the standard can be supplemented by additional items appropriate to the hazards identified by the risk assessment. This may result for example in increasing the number of burn dressings where a significant risk of burn injury is likely.

What size of kit do I need?

The size of kit required is dependent on a combination of the level of risk and the number of employees in the workplace. The table below provides guidance for employers but does not replace the requirement to carry out a risk assessment.

<table>
<thead>
<tr>
<th>Category of Hazard</th>
<th>Number of Employees</th>
<th>Number and Size of First Aid Kit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Hazard e.g. shops, offices, libraries</td>
<td>Less than 5</td>
<td>1 Small Kit</td>
</tr>
<tr>
<td></td>
<td>5 – 25</td>
<td>1 Medium Kit</td>
</tr>
<tr>
<td></td>
<td>More than 25</td>
<td>1 Large kit per 25 employees</td>
</tr>
<tr>
<td>High Hazard e.g. light engineering and assembly work, food processing, extensive work with dangerous machinery or sharp instruments, construction, chemical manufacture etc</td>
<td>Less than 5</td>
<td>1 Small Kit</td>
</tr>
<tr>
<td></td>
<td>5 – 25</td>
<td>1 Medium Kit</td>
</tr>
<tr>
<td></td>
<td>More than 25</td>
<td>1 Large Kit per 100 employees</td>
</tr>
</tbody>
</table>

The table is for guidance only and each workplace needs to evaluate its own level of risk. Special circumstances also need to be considered such as remoteness from medical services, special hazards such as use of hydrofluoric acid and sites with several buildings. In these situations there may need to be more first aid kits than set out in the table.

Health and Safety Executive (HSE)

The HSE do not give a strict list of products that should go into a first aid kit but instead suggests that the kit needs to be ‘adequate and appropriate in the circumstances’. This is done by performing an assessment of needs on each area of the workplace. There is no requirement to keep written records of this but the HSE strongly recommend doing so as this will enable the employer to give explanation for their decisions if needed.

Important things to consider in your assessment of needs.

1. The nature of your work

The first thing to consider is the kind of work that is undertaken in your workplace and the hazards this might cause. Bear in mind that different areas of your business will carry different risks. For example, a different assessment of needs will need to be done for an office compared to the shop floor of a factory.

2. Size of the organisation

Generally, the larger the workforce the greater the need your organisation will have for First Aid provisions.

3. Type of workforce

Consideration needs to be taken for the types of employees you have including pregnant workers, young workers and those with disabilities.

4. Distribution of workforce

An organisation whose employees are spread out over a vast area will require more first aid kits than one whose workers are all in the same building.

Employers must regularly review first aid kit contents to ensure provisions are in place and use by dates have not expired. If a first aid kit is stored in a public area there needs to be procedures in place to frequently check the contents to prevent theft and tampering. This process is normally the duty of a first aider or a trained person.

From your risk assessment, what degree of hazard is associated with your work activities? How many employees do you have? What first-aid personnel do you need?

| Low-Hazard e.g. shops, offices, libraries | Fewer than 25 | At least one appointed person |
| | 25 – 50 | At least one first-aider trained in EFAW |
| | More than 50 | One additional first-aider trained in FAW for every 100 employed (or part thereof) |

| Higher-Hazard e.g. light engineering & assembly work, food processing, warehousing, extensive work with dangerous machinery or sharp instruments, construction, chemical manufacture | Fewer than 5 | At least one appointed person |
| | 5 – 50 | At least one first-aider trained in EFAW or FAW depending on the type of injuries that might occur |
| | More than 50 | At least one first-aider trained in FAW for every 50 employed (or part thereof) |

First Aid Stations

BS Compliant Complete First Aid Point
Comprehensive first aid points for managing a wide range of workplace accidents and emergencies from first aid, through to burns, eye care and biohazard disposal. Helps you comply with British Standard requirements for workplace and provides all the necessary supplies to create an effective first aid point, such as brackets, bracket labels and photo luminescent bracket header.
Ref: 4F9819 Small
     4F9820 Medium
     4F9821 Large

BS Compliant Eye Wash First Aid Point
Includes a first aid kit and an emergency eyewash kit which are essential in any work environment. Fully stocked, with unique brackets to ensure kits are securely fixed to the wall. The kits are removable for portable use, and the point has bracket labels to identify when a kit has been removed, as well as photo-luminescent bracket headers for easy identification of the kits location even in dark or smoky conditions.
Ref: 4F9822 Small
     4F9823 Medium
     4F9824 Large
British Standard Motor Vehicle First Aid Kits

BS 8599-2 the new national standard for first aid provision within motor vehicles specifies three sizes of vehicle first aid kits, with suitable content for all types of vehicles, including motorbikes, cars, taxis, mini buses, commercial vehicles, buses and coaches. The kits have been devised by leading road safety experts and are the best practice for the treatment of minor wounds and serious injuries prior to the arrival of the emergency services.

What size of kit do I need?

<table>

</tr>
<tr>
<td>17+</td>
<td>2 x Minibus &amp; Bus First Aid Kit (Multi-level vehicles may require more than two kits)</td>
</tr>
</tbody>
</table>

When there are special circumstances, such as remoteness from Emergency Medical Services or unusual hazards specific to a special undertaking, there may be a need to provide a greater number of first aid kits than outlined in the table and to supplement first aid provision with additional components. In these instances a risk assessment would be carried out to ascertain the requirements.

BS 8599-2 Compliant Motor Vehicle First Aid Kit

A comprehensive range of options for the BS 8599-2 Motor Vehicle Kit including versions in rigid plastic, soft nylon cases or wallets.

Trauma First Aid

Catastrophic Bleeds

Trauma first aid supplies are essential for any workplace that:

- Is high risk including glass and metal handling environments
- Is a sector identified by RIDDOR data as benefiting from training in the use of tourniquets including construction and forestry
- Identifies a chance of someone receiving a serious injury/catastrophic bleed in their risk assessment
- Has a risk of an attack in the workplace

The survival of a casualty following a trauma injury is reliant on fast and effective treatment provided before the arrival of Emergency Services. If there is a chance of someone experiencing a serious bleed or traumatic injury then it is essential to have emergency first aid supplies available.

Water-Jel ChitoClot Adhesive Haemostatic Dressings

Work alongside the body's natural clotting process to stop bleeding fast. Can be used following a trauma by covering a serious bleed, reducing blood loss in a casualty and are also useful for people whose natural blood clotting process does not work as well or for those on blood thinning medication.

Made from 100% Chitosan and the surround is a clear adhesive film. Stay firmly in place when they come in to contact with liquid and are easily and quickly applied to any wound.

Ref:
- 4F9842 Small Assorted pack of 5
- 4F9841 Large Assorted pack of 5

Water-Jel Emergency Tourniquet

Can be used on catastrophic bleeds when direct pressure is not enough. Suitable for use on a limb to restrict the blood flow. Easy to apply, velcro adjustable strap suitable for any size limb. Turns and clips in 90 degree intervals ensuring the tourniquet can be clipped in place as tightly as required. High visibility yellow colour ensures applied tourniquet is easily identified by emergency services.

Ref: 4F9834

Evolution Catastrophic Bleed Point

Designed to be a complete solution combining a British Standard Compliant First Aid Kit with a specially designed kit for treating catastrophic bleeds. The Evolution Catastrophic Bleeds Point is ideal for putting in any workplace that is a high risk environment or has identified sever and catastrophic bleeds as a risk including metal and glass handling environments.

- Includes wall mounting brackets.
- Photoluminescent headers.

Ref: 4F9831

Emergency Trauma Kit

Provides essential supplies for treating multiple casualties following a traumatic event. Includes supplies specifically designed for treating catastrophic and life threatening bleeds including tourniquets, trauma dressings and haemostatic dressings. Kit contains individually packaged British Standard Compliant Workplace First Aid Kit, Water-Jel Burns Kit and Body Fluid Disposal Kit. Supplied in either a red emergency bag for easy portability or a fixed location wall mounted cabinet.

Ref:
- 4F9838 Kit in Cabinet
- 4F9837 Kit in Emergency Bag

Personal Trauma Kit

Designed to treat serious and significant bleed injuries, containing a range of supplies to help stop blood loss. Designed for high risk environments including glass and metal handling. Kit available with Chito-SAM Z-fold dressing, designed to stop lethal bleeding fast.

Ref:
- 4F9843 Personal Trauma Kit
- 4F9844 Personal Trauma Kit with Chito-SAM Z-Fold

HypaCover Trauma Dressing

Provide easy and ideal treatment of severe wounds. The highly absorbent dressing pad absorbs ten times its own weight. Pressure can be easily and quickly applied and maintained with the use of the attached high pressure bandage. The Velcro-style fastening makes it easy and convenient to secure in place over the wound.

Ref:
- 4F9835 10 x 18 cm Medium
- 4F9836 15 x 18 cm Large

Chito-SAM 100 Haemostatic Dressings

Controls bleeding in minutes. The superior performance hemostatic dressing is made of non-woven 100% chitosan. Chito works independently to the body's normal clotting process. The tear anywhere packaging allows for easy access and application of the dressing. The dressing is easily removed with water or saline solution. Each sterile dressing comes individually wrapped.

Ref:
- 4F9839 Patch 10x10 cm
- 4F9840 Z-Fold 7.5 x 183 cm
Defibrillators

There is currently no legislation in place in the UK or Ireland which obliges certain businesses or premises to provide an Automated External Defibrillator (AED), however AED’s have been described as the single most important development in the treatment of SCA. AED’s are easy to use, compact, portable and very effective. Some machines deliver the shock automatically without needing any further action by the operator; others instruct the operator to press a button to deliver the shock. They are safe and will not allow a shock to be given unless the heart’s rhythm requires it. The machines should be stored where they are most likely to be needed; they must be accessible with the minimum of delay. All persons working on a site need to be aware of their purpose and location, and the steps to be taken should someone collapse. Every minute without CPR and defibrillation reduces chances of survival by 10%.²

Lifeline AED Semi-Automatic Defibrillator

The Lifeline AED is a semi-automatic external defibrillator - once you’ve placed the pads on the patient it will check to see if defibrillation is needed, prompting the user to press the shock button.

- 5-year battery as standard but an Industry leading 7-year battery option also available.
- Clear and concise voice instructions.
- Portable and lightweight - 1.9 kg.
- Hardwearing - tested to military standards.
- IP54 ingress protection rating - high water and dust protection.
- Low maintenance - daily self-tests and a bright status indicator light.
- 8-year warranty.
- Training conversion kit available.

Ref: 55G0001

Lifeline VIEW Semi-Auto Defibrillator

The Lifeline VIEW has all the great features of the Lifeline AED and is the first AED to offer step-by-step visual feedback for performing CPR, rescue breathing and external defibrillation.

- Full colour video screen.
- Clear and concise voice instructions.
- 4-year battery option.
- Portable and lightweight - 1.4 kg.
- IP55 ingress protection rating - one of the highest dust and water protection ratings on the market.
- Training conversion card available.

Ref: 55G0011

Lifeline AUTO Defibrillator

The Lifeline AUTO has all the same features as the Lifeline Semi-Automatic Defibrillator; with the difference that the shock is delivered automatically without the need to press the shock button, ensuring treatment is only delivered when needed.

Ref: 55G0016

Lifeline Semi-Automatic and AUTO Defibrillator Accessories

A range of accessories compatible with both the Semi-Automatic and AUTO versions of Defibtech’s Lifeline defibrillators.

4F9629 AED Responder Kit

LIFEPAK CR Plus AED Bundle

This fully-automatic model is designed to deliver a shock only if it determines the heart needs it. Weekly and monthly self-tests ensure its always ready to use, and will alert you if the battery is low. Includes a 4-indicator readiness display that provides an instant visual check. Comes with an 8-year warranty.

Bundle includes:
- LIFEPAK CR Plus AED Defibrillator.
- AED Defibrillator Wall Bracket.
- AED Responder Kit.
- Defibrillation & CPR A2 Poster.
- AED Sign.
- Nearest Automated External Sign.
- AED Trained Personnel Sign.

Ref: 55G0090 Bundle
4F9627 Defibrillator only

Telefunken AED Defibrillator Bundle

Simple, easy-to-use defibrillator that comes complete in a bundle to ensure you have all the essential items. Fully-automatic AED designed to deliver a shock only if it is required. The first aider does not need to press a shock button. Battery and electrodes have a 3-year standby time.

Bundle includes:
- Telefunken AED Defibrillator.
- AED Defibrillator Wall Bracket.
- Defibrillation & CPR A2 Poster.
- AED Sign.
- Nearest Automated External Sign.
- AED Trained Personnel Sign.

Electric Shock Rescue

If there is risk of someone receiving an electric shock in your workplace, it is essential to have suitable equipment and supplies in place to be able to safely rescue them and treat their injuries. Following someone receiving an electric shock it is essential that the rescuer remains as safe as possible. By switching off all power sources and equipping themselves with appropriate rescue equipment including a rescue hook and matting will help to ensure their safety.

After receiving an electric shock the casualty may well be unresponsive or have serious burn injuries. It is essential to have the appropriate first aid supplies to hand in order to treat the casualty. A rapid response following someone receiving an electric shock can optimise their chance of survival.

Electrical Safety Matting

Safe working around high voltage equipment is incredibly important given the often potentially fatal consequences associated with electric shock.

Insulating matting beneath an operator’s feet can prevent electricity causing injury or even death should an accident occur. Key areas to consider are switchboards, electrical machinery, and any other electric equipment that uses high voltage power. It’s incredibly important therefore that the right matting product is specified against the voltage levels in the location. The latest British Standard categorises electrical insulating matting in 5 grades from 0 to 5, with working voltages ranging from 1kv to 36kv depending on the thickness of the mat. Electrical operators are particularly vulnerable to the dangers of electrical accidents, and the simple use of matting is a preventative measure that immediately makes these working environments safer.

Evolution Electric Shock Rescue Pole with Poster

Designed to manoeuvre or rescue a person or object, who has received an electric shock whilst ensuring that the rescuer stays safe.

• Comes with a wall mount and can be positioned vertically or horizontally.
• Suitable for use on installations of up to 45kV making it ideal for most workplaces.
• Hook is 1.5 m long.

Ref: 55G0018

Evolution Electric Shock First Aid Point

Ideal for any workplace that has a risk of electrocution to employees.

Includes:
• British Standard Compliant First Aid kit to assist compliance with the BS 8599-1.
• Burn Stop Burns Kit.
• Electric Shock Poster providing effective first aid and safety information.

Ref: 55G0017

Evolution Electric Shock Rescue Point

This wall mounted solution is ideal for rescuing someone and providing first aid treatment following an electric shock.

This point is essential for any workplace where there is a risk of electrocution.

Includes:
• British Standard Compliant First Aid Kit.
• Burn Stop Burns Kit.
• 1.5 m long Electric Shock Rescue pole suitable or installations of up to 45kV so is ideal for most workplaces.
• Guidance Sign.
• Electric Shock Guidance Poster.
• Wall mounts included.
• PPE Point includes an empty glove dispenser allowing you to choose the correctly rated gloves for your workplace.

Ref: 55G0019 Electric Shock 55G0082 PPE Electric Shock

Electrical Switchboard Matting

Fine fluted slip-resistant matting, designed specifically for use in high voltage areas.

• Provides safety for operatives against electrical shocks.
• 6 mm high tested to 11,000 volts for 450 volt rated working.
• 9.5 mm high tested to 15,000 volts for 650 volt rated working and conforms to BS 921:1976.
• Supplied in black.

COBAswitch BS EN:61111

Fine fluted slip-resistant matting, designed specifically for use in high voltage areas.

• Provides safety for operatives against electrical shocks.
• Ideal for use in front of switchboards and high voltage equipment.
• Ribbed surface offers traction underfoot.
• Resistant to acid, oil and low temperature.
• Manufactured with colour-coded tape to depict the classification on the reverse of the matting.

Burns Kits

Burns are a common workplace injury and can usually be effectively treated with simple first aid. Early cooling (within 20 minutes of the injury occurring) reduces burn depth and pain and prevents the burn from getting worse.

The BS 8599-1 standard has introduced water based sterile gel burn dressings which do not require any pre-cooling with water and recommends a conforming bandage to secure it.

Burn Stop Burns Kit

Economical first aid treatment for burns injuries which includes Burn Stop dressings and gel, suitable for treating superficial and partial thickness burns. Conforms to BS 8599-1 requirements for burns dressings.

Ref:
- 4F9665 Small (Type 1)
- 4F9666 Medium (Type 2)
- 4F9667 Large (Type 2)
- 4F9810 Wall Bracket for Type 1
- 4F9688 Wall Bracket for Type 2

Burn Stop Burns Dressings

Suitable for treating superficial and partial thickness burns. Conforms to BS 8599-1 as pre-cooling is not required. Cools the burn, soothes the pain and helps to prevent contamination.

Ref:
- 4F9668 Sachet, 3.5 g
- 4F9669 Bottle, 50 ml
- 4F9670 Dressing, 10 x 10 cm
- 4F9671 Dressing, 20 x 20 cm
- 4F9672 Dressing, 20 x 50 cm

Evolution Water-Jel Burns Kit

Comprehensive professional burns kit for any environment containing a variety of products specifically designed for the treatment of burn injuries. All kits include Water-Jel dressings, which are suitable for treating partial and full thickness burns, making them the ideal first response solution. Medium and large kits also include cutters for rapid removal of clothing from the burn.

Water-Jel Burn Dressing

Patented Water-Jel sterile dressings are easy to carry, store and use. The medical grade non-woven dressing is saturated with a scientifically formulated cooling gel that immediately cools the burn and begins to halt its progression whilst providing relief to the casualty. It also protects against airborne infection. The dressings do not stick to the wound and can be applied directly over clothing.

Hydrofluoric Acid Burn Kit

Essential supplies for dealing with hydrofluoric acid skin burns. Includes
- Calcium Gluconate Gel for fast treatment and pain relief.
- Dressings and bandages protect burns from infection whilst enroute to hospital.
- Supplied in an Evolution case with quick release wall mounting bracket.

Ref: 4F9846

Water-Jel Calcium Gluconate Gel

Specialised treatment of hand burns.
- Antidote for hydrofluoric acid skin burns.
- Heals and relieves pain, and is easy and painless to apply.
- Creates no risk of increasing tension in the tissues and reduces the risk of hypocalcaemia.
- Compact to fit into first aid kits and pockets for fast response in an emergency.

**Safety Showers**

**1200 Litre Tank Safety Shower**

Designed for areas where water supply and/or flow rate is inadequate or too unreliable to operate a standard constant supply shower:

- 1200 Litre tank capacity.
- Eyebath/facewash unit – fitted inside frame.
- Platform operation foot control.
- Side paneling in green.
- 3 kW immersion heater.
- Suitable for use in non-flameproof areas.
- 230 volts.
- Fully compliant with ANSI & BS EN 15154.

*Teardrop* water reduces the possibility of thermal shock to the user.

Eyewash Stations

If mains tap water is not readily available for eye irrigation, at least one litre of sterile water or sterile normal saline (0.9% w/v) in sealed, disposable containers should be provided. Once the seal has been broken, containers should not be kept for reuse. Containers should not be used beyond their expiry date HSE ACOP 3(40).

HypaClens Eyewash Station complete with Eyewash

Wall-mounted eyewash station (fixings not included) supplied complete with 2 x 500 ml HypaClens eyewash bottles. Integral mirror aids self-administration of eyewash.

Ref: 4F9656

HypaClens Sterile Eyewash

0.9% sterile saline solution ideal for irrigating eyes and general wound washing tasks.

Irrigates eyes that have been contaminated with particles or liquid.

Ref: 4F9658 250 ml Bottle
4F9659 500 ml Bottle
4F9661 20 ml Pod – pack of 25

Sterile Eye and Wound Wash Spray

Multi-function eyewash can be used repeatedly as contents remain sterile after each application. Sterile 0.9% saline solution is stored in a sealed bag and does not come into contact with the propellant. Unique nozzle turns the solution into a fine mist for maximum effectiveness.

Ref: 4F9660

Evolution Plus Eyewash Kit

Self-supporting workbench allows the kit to be opened whilst the eye injury is administered to. Supplied with quick release wall fixing bracket and kit identification label.

Kit includes: 2 x 500 ml HypaClens Sterile Eyewash Bottles and 2 x HypaCover Sterile Eye Dressings.

Salvequick Pilferproof Plaster Dispenser

Clean, dry and hygienic this dispenser allows you to pull plasters downwards, which avoids getting any dirt or blood on any other plasters. When you pull a plaster out of the dispenser, one side is uncovered making the plaster ready to use, allowing you to put a plaster on with one hand.

The hygienic door keeps the plasters clean and fresh, and makes it easy to see when you need to fill up with new plasters. The plaster refills are locked in the dispenser making it pilferproof; it is easy to remove the empty refills using a special key.

Cederroth Eyewash Station complete with Plaster Dispenser

The Cederroth Eye Wash Station comes with a Salvequick Plastic Dispenser, space for two bottles of Cederroth Eye Wash and has additional space for your own choice of products such as protective glasses or gloves.

A transparent door with rubber edges protects the bottles against dust and dirt, which means that you can install it in even the toughest of environments.

Cederroth Eye Wash (purchased separately) works to neutralise the effects of both alkali and acid splashes, giving a quicker result than normal saline solutions; working more effectively on alkalis.

Contains: 40 Sterile Textile Plasters, 40 Sterile Plastic Plasters, Eyewash Instructions and Key.

Ref: 4F9662 Cederroth Eye Wash Station
4F9730 Cederroth Eye Wash Bottle, 500 ml

Cederroth Eyewash

Quick twist opening for instant treatment and controlled flow directs the eyewash liquid into the eye constantly for approximately 1.5 minutes. Shelf life of 4.5 years from date of manufacture.

Neutralising effect against acid and alkaline splashes.

Ref: 4F9663 Eye Wash – Pack of 2
4F9731 Wall Bracket

Rapid response is required for any eye injuries sustained in the workplace as most damage to the eye occurs in the first few seconds of injury. Cederroth eyewash bottles open automatically when you twist them out of the bracket allowing instant treatment. The bottles are also designed to allow you to rinse your eye with a good flow of liquid for around 1.5 minutes.
First Aid Room

The Health and Safety (First-Aid) Regulations 1981 states

Employers should provide a suitable first aid room or rooms where the assessment of first aid needs identifies this as necessary. The first aid room(s) should contain essential first aid facilities and equipment, be easily accessible to stretchers and be clearly signposted and identified. If possible, the room(s) should be reserved exclusively for giving first aid.

A first aid room will usually be necessary where there are higher hazards such as in chemical industries or on large construction sites, and in larger premises at a distance from medical services. A designated person should be given responsibility for supervising it. The room(s) should be clearly signposted and identified by white lettering or symbols on a green background.

First aid rooms should:
- be large enough to hold an examination/medical couch, with enough space at each side for people to work, a chair and any necessary additional equipment;
- have washable surfaces and be kept clean, tidy, accessible and available for use at all times when employees are at work;
- there should be adequate heating, ventilation and lighting;
- have a sink with hot/cold running water – preferred but not a necessity;
- be positioned as near as possible to a point of access for transport to hospital;
- display a notice on the door displaying the names, locations and, if applicable the contact details of first-aiders.

If the first aid room(s) cannot be reserved exclusively for giving first aid, employers need to make sure that the first aid facilities can be made available quickly if necessary.

Complete First Aid Room

A simple and easy way to set up a functional first aid room in your premises.

Comprises:
- First Aid Couch
- First Aid Room Sign
- 3-Tier Trolley
- Scarlet Cotton Blanket
- Polyester Pillow
- Metal Cabinet
- Pedal Bin
- Economy Couch Roll

HypaClean Sterile Alcohol Free Wipes
Ideal for wound cleansing and conform to BS 8599-1 requirements for sterile moist wipes.
Individually wrapped and impregnated with an alcohol free, aqueous cleansing solution. Supplied in a box of 100 wipes.
Ref: 4F9652

HypaClean Moist Wipes
Multi purpose wipes for cleansing skin prior to dressing wounds. Individually wrapped and impregnated with an alcohol free, aqueous cleansing solution. Supplied in a box of 100 wipes.
Ref: 4F9760

HypaCover Sterile Eye Dressing
Cushions the eye and provides initial protection from possible infection. The sterile, highly absorbent wound pad is soft and comfortable for the patient and secured by a strong elastic bandage. Supplied in a pack of 6.
Ref: 4F9648 10 x 8 cm

HypaCover Low-Adherent Dressing
Low-adherent, absorbent wound dressing helps draw exudates away from the wound. Suitable for abrasions, superficial cuts, lightly exuding wounds and burns treatment. Dressing retention sheets or microporous tape should be used to hold the dressing in place. Individually wrapped and sterile and supplied in packs of 25.
Ref: 4F9643 5 x 5 cm
4F9757 10 x 10 cm

HypaCover Sterile Dressings
Premium quality sterile wound dressings, vital for any first aid kit. Unmedicated pad cushions the wound and provides initial protection from infection absorbing any exudates. A strong conforming bandage holds the dressing securely in place. Supplied in a pack of 6.
Ref: 4F9644 4 x 2 cm Small
4F9645 12 x 12 cm Medium
4F9646 18 x 18 cm Large
4F9647 28 x 18 cm Extra Large

HypaCover Adhesive Dressing
Highly absorbent wound pad is covered with a non-adherent film to prevent strike through and reduce trauma when dressing is removed. Made from a non-woven construction and hypoallergenic adhesive, this dressing is ideal for wounds to the neck, elbow or hip. Individually wrapped and sterile and supplied in packs of 25.
Ref: 4F9642 8.6 x 6 cm
4F9756 10 x 8 cm
Dressings and Bandages

**HypaBand Crepe Cotton Bandage**
Woven elasticated bandage ideal for giving light support to sprains and strains. Can also be used for dressing retention. Supplied in a pack of 6.
Ref: 4F9780 5 cm x 4.5 m
4F9781 7.5 cm x 4.5 m

**HypaBand Conforming Bandage**
Ref: 4F9784 5 cm x 4 m
4F9785 7.5 cm x 4 m

**HypaBand Tubular Support**
Washable cotton/elastic bandages for the support of injured limbs. Relieves discomfort during rest and activity.
Ref: 4F9782 Adult Hands 6.75 cm x 10 m
4F9783 Arms and Legs 7.5 cm x 10 m

**HypaBand Triangular Bandage**
May be used for a wide range of purposes from wound care (hand and foot cover, scalp bandage) to providing support and elevation for injured limbs. Individually wrapped for cleanliness and supplied in a pack of 6.
Ref: 4F9755

**HypaBand Microporous Tape**
Ideal for dressing retention on non-flexing areas. White non-woven paper tape that allows skin to breathe. Special adhesive holds dressings in place yet provides minimal trauma for the casualty upon removal.
Ref: 4F9649 2.5 cm x 5 m

**HypaPlast Waterproof Adhesive Tape**
Blue waterproof adhesive tape ideal for securing dressings in catering environments.
Ref: 4F9758 2.5 cm x 5 m

**HypaPlast Fabric Strapping**
Fabric material conforms easily to many areas of the body including joints such as knuckles. Ideal for securing dressings.
Ref: 4F9651 2.5 cm x 4.5 m

**Protective Finger Tape**
Cohesive, hand tearable material tape. Ideal for protecting fingertips when carrying out cutting or other hazardous tasks.
Ref: 4F9759 2.5 cm x 27 m

**FingerBob Pre-Rolled Tubular Blue**
Pre-rolled, elasticated finger bandages for holding dressings in place and protecting wounds on the fingers. Ideal for food handling environments. Supplied in a pack of 6.
Ref: 4F9761

**Fingerstall**
Plastic finger covers with an extended plastic strap to tie around the wrist. Use for protecting wounded fingers from further injury and to keep dressed fingers covered in ‘clean’ environments. Ideal for food handling environments. Supplied in a pack of 10.
Ref: 4F9762
### Plasters

**HypaPlast Detectable and Blue Catering Plasters**

Essential for catering and food handling applications.

High quality hypoallergenic plasters that are washproof and metal detectable. Individually wrapped and sterile.
